

VIRTUE V10

LENGTH 9.89 m | BEAM 2.9 m | 1 CABINS | YEAR 0

Virtue

The smoothest and most sustainable adventure boat on the market. With a fixed roof for permanent protection from the elements, this beauty boats many features for active relaxation and fun in the water, while using every trick in the boat building book to be more efficient and ecological. Combining its highly spirited character with luxury standard equipment and quality, the V10 is inspired by Scandinavian style, & boasts highly efficient Swedish Petestep hull technology. It is one of the very few boats specifically designed around and for use with electric outboards and their rapidly advancing battery technology. It uses solar panels on the fixed sunroof to support the main charging system. The V10 hull design pledges to minimize drag and motion and maximize efficiency and smoothness when cruising the waters at planing speeds. It reduces energy consumption up to 35%, enabling smaller engines for the same driving experience. Depending on the selected engines the V10 achieves a top speed over 50 knots and cruising speed between 20 and 40 knots
